The Company is aggressively pursuing its deployment program to achieve the objective of being the single largest alternative fixed telephony services provider, after the incumbent.

FUTURE OUTLOOK

With the objective of providing a better and seamless WLL service, the Management has decided to further strengthen the existing network deployment by increasing the installed capacity. The first initiative in this respect is being taken in Lahore where additional BTS sites are being deployed.

The Management is keeping a keen eye on the upcoming competition and is focused on expanding the subscriber base, thereby, capitalizing on the first movers advantage in all virgin markets. With a view to stay competitive in the WLL market, the Management has taken an initiative to bring in more pull so as to complement the existing push strategy. Launch of P3K scheme is a step in this direction and the results have been very encouraging (average per day activations have doubled, subsequent to the launch of this scheme).

General

Worldcall appreciates the hard work and determination of its employees that has helped it to become one of the leading telecom companies in Pakistan. Worldcall continues to rely on its employees for its future expansion and believes in the mutual sharing of rewards that are a result of the endeavors of its employees.
