DIRECTORS' REVIEW

The Directors of Worldcall Telecom Limited ("WTL" or the "Company") are pleased to present the brief overview of the financial information for the second quarter and six months ended 30 June 2011.

Financial Overview

The performance during second quarter of half year has evidenced some signs of recovery. Comparing the quarter to 30 June 2011 with comparative period last year the revenues show slight growth of 3% along with the reduction in direct cost by 5%. Growth in the revenue came on account of successful delivery of USF milestones. Cost optimization endeavors led to 7% saving in the operating cost resulting in the operating profit of Rs 29 million for the 2nd quarter. This achievement is noteworthy as this reflects the positive outcome of the policies currently being followed by the management under supervision of the Board. Further this also indicates strengthening of operations and improvement in market performance. On the similar note finance cost has also showed savings of 10%. These savings came as Company discharged the high cost debt following the funding of USD 35 million during the period.

Cumulative results of six months against the comparative period last year continue to reflect the loss owing to decline in revenue and higher incidence of depreciation and network maintenance charges. Stability in the market prices of investment helped in curtailing the impairment loss. After accounting for other income and taxation the period ended with net loss of Rs 300 million.

Future Outlook

After successful conclusion of first phase of funding of USD 35 million, the Company is currently engaged with consultants for the second tranche of funding of the same amount. The previous funding has been primarily used to off load high cost debt with some marginal allocation to financing expansion projects. Activities on various expansion projects are in progress however management foresees acceleration of these activities once the ongoing transaction for next USD 35 million funding is completed.

The market as a whole is offering a highly competitive playing field. The rate instability in the international termination segment along with margin erosion in other business streams due to rising operational costs are going to be the areas of concern for the future. The prevailing uncertainty in pricing of termination business and the resultant margins are expected to further deteriorate if industry players do not take immediate measures to address the issue.

The Company's other initiatives with respect to enhancement of business streams and cost optimizations are being pursued in line with the business plan. It is expected that timely release of second phase of funding will ensure early completion of these projects along with ensuring turnaround on the financial performance front.

Statement U/S 218 of the Companies Ordinance, 1984

The board of directors re-appointed Mr. Babar Ali Syed through resolution by way of circulation on August 10, 2011 as Chief Executive Officer of the Company for a term of 3 years commencing August 12, 2011. His terms and conditions of appointment will remain the same.

Company's staff and customers

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of condensed interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures.
